Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3729

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 42, 48, 54-58 and 62-66 are rejected under 35 U.S.C. 102(b) as being anticipated by Carver, Pat No. 4,916,002; hereinafter Carver.

Carver's teaching speaks for itself Contact elements in batches spring contact element upon a sacrificial substrate (Cf. Col 5 and Figs. 5 and 7) are created and while the contacts are resident on the sacrificial substrate, the contact elements are connected to terminals which is construed to be an electronic device (Cf. Col 6 (near the bottom) and Figs 5 and 7)). After the spring contacts are mounted the sacrificial substrate is removed (C f. Figs 2 B and 2 C and related disclosure).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 43, 49 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carver. The above remarks are incorporated by reference in this paragraph and made a part hereof as though those remarks were fully written out in their entirety. As further applied to Claims 43 and 50 applicants admit that a space transformer i.e. probe card mounted with a space transformer or a multi-layer interconnection substrate having

terminals disposed at a second pitch on one surface and terminals at a second pitch on the opposite surface is old in this art and was published in a PCT application on 23 May 1996) (Cf. PCT/US95/14844 filed 13 Nov 95 (WO96/15458). Hence it would have been obvious to modify Carver's electronic component (seen in Figs. 5 and 7 (at 30 and 56 respectively) so that the component would be a space transformer.

Claims 59-61, 67 and 68 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
